

Amanda M. Acevedo, Ph.D., is a Program Director in the Basic Biobehavioral and Psychological Sciences Branch (BBPSB) of the Behavioral Research Program at the National Cancer Institute.

Dr. Acevedo cultivates a portfolio of grants related to social and psychophysiological influences on cancer control. Dr. Acevedo's program of research focuses on psychosocial factors (e.g., stress, discrimination, emotion, and cultural norms and expectations regarding emotion expressions) that influence health behaviors, biomarkers, and/or physiological responses to stressors like pain, particularly in Latino samples. This work reflects a multilevel approach to better understand health disparities and inequities, particularly within the broader social context. Dr. Acevedo has attended American Psychosomatic Society (APS) annual meetings regularly since 2014 and considers APS her research home.

Dr. Acevedo earned a Ph.D. in Psychology and Social Behavior with a Health Psychology major, and a Quantitative Methods minor from the University of California, Irvine. She is also a proud alumnus of Alverno College in Milwaukee, Wisconsin, where she received a Bachelor of Arts degree in psychology. Prior to joining NCI as a Program Director, Dr. Acevedo was a Cancer Research Training Award Post-doctoral Fellow at NCI.
